Subject: Treatment and disposal of high-level radioactive wastes at Hanford

Dear John --

Attached is an article I wrote a while back that appeared in Science and Global Security at Princeton regarding the Hanford Waste Treatment Plant.

<http://www.princeton.edu/sqs/publications/sqs/pdf/13%201-2%20alvarez%2043%2086.pdf>

This facility is the largest, most expensive, and perhaps, riskiest nuclear facility undertaken to process the detritus from making plutonium in the United States. I would appreciate it, if you could share this with the Board and members of the public. It has a long and troubled history, which appears to continue.

Best Regards,

Bob Alvarez
